

Karibu Tanzania – Baobab Guesthouse in the Canaan Children Centre!

A year and a week have passed from the idea to moving in. Now it ready, the new **guest house in the Canaan Center**. The privately financed house is a building block of the sustainable financing of the running costs of the orphanage – in addition to farm activities and a preschool that will soon be built.

Back of the house in the rising morning sun with a view of the almost 5000 meter high Mount Meru and the bush landscape of Tanzania.

Our **accompanying guests** are cordially invited to be "right in the middle of it", at the same time without missing the usual comfort of a good hotel. The room prices are significantly lower than those charged in Arusha for comparable facilities. Nevertheless, after deducting the costs, there is enough left over to generate an income for the center. Of course, this alone is not sufficient, but it is a building block of our plan for sustainable financing.

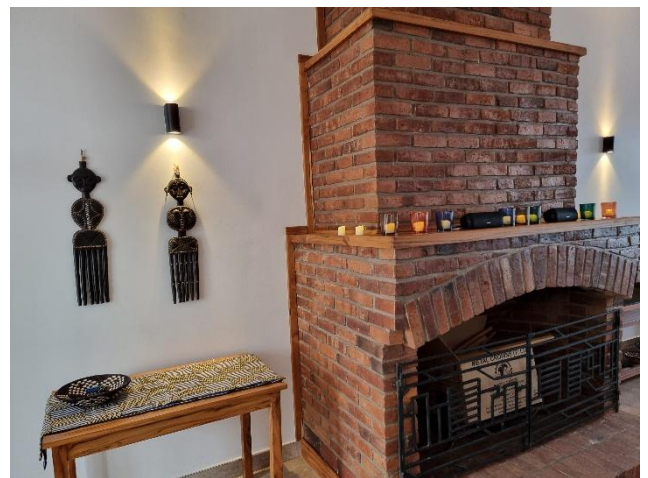

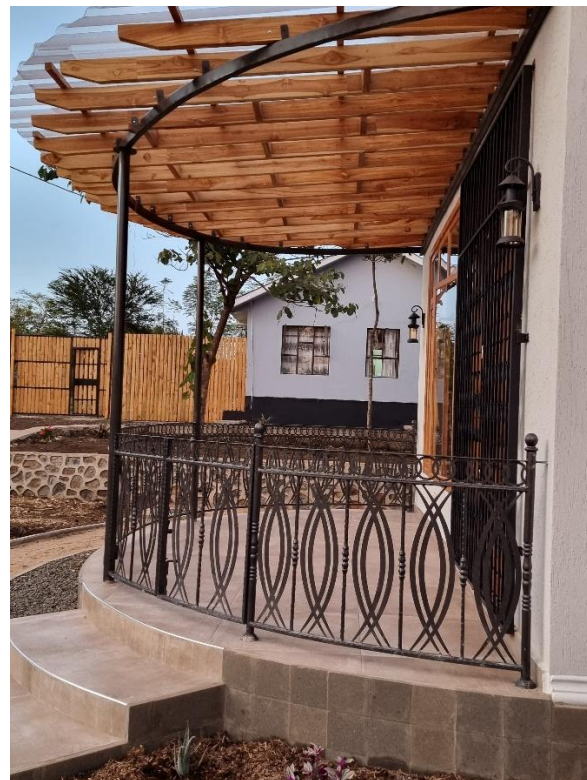

Front of the house with vegetable garden, which is newly prepared before the rainy season. To the left and right are two of the guest rooms with their own balconies, in the middle the terrace for sundowners with a view of the boys' dormitory of the orphanage.

The spacious living-dining area is furnished with certified tropical woods from a craft workshop supported by us, a collection of typical handicrafts from various African countries make up the special atmosphere.

Every room has a private bathroom, three rooms have a private balcony, room No. 4 can use the main terrace and balcony next to the kitchen.
